

PRESENTS

„The Basis of Life“

Date Tuesday, 30th May

Time 18:00 - 20:00

Location Collège Doctoral Européen, 46 Boulevard de la Victoire

Program

How to inherit genes?

Thomas Sexton

How to read genes?

Didier Devys

How to bring genes to life?

Mélanie Meyer

If you have asked yourself of what exactly **genes** - the codes of life - are made of, how they are **inherited**, what they encode for, how their code is **read** and brought to **life**, join us at this conference where these questions and others will be addressed by three respected biologists.

This conference is organized by Veronique Fischer,
member of the 2016 International PhD Program (Malala Cohort)

Programme doctoral international
