

POSITION FOR POSTDOCTORAL SCIENTIST IN GONZALEZ-SUAREZ LABORATORY CANCER EPIGENETICS AND BIOLOGY PROGRAM

POSTDOCTORAL POSITION

Bellvitge Institute for Biomedical Research (IDIBELL) offers a postdoctoral contract to join the Transformation and Metastasis group led by Dr. Eva González-Suárez within the Cancer Epigenetics and Biology Program (PEBC) <http://www.idibell.cat> & <http://pebc.cat/>

The laboratory of Dr Gonzalez Suarez is funded by national grants and a European Research Council ERC-Consolidator grant.

The primary goal of Dr. Eva González-Suárez's laboratory is to understand the signaling pathways implicated in epithelial stem cell fate, their alterations during cancer and metastasis, and the interactions between tumor cells and microenvironment. We have a multidisciplinary approach using mouse models, cell cultures, clinical samples and molecular and cell biology techniques to translate basic research into clinically relevant results.

REQUIREMENTS

We are looking for motivated postdoctoral scientists holding a PhD in a relevant discipline with interest in cancer biology. Candidates must have:

- An outstanding publication record in peer review journals.
- Experience working with mouse models of cancer and patient derived xenografts.
- Strong technical skills in tumor immunology and molecular biology.

WE OFFER

- The opportunity to contribute to cutting-edge research projects and work closely with an international team of scientists and work in one of the leading labs in Europe.
- A 3-year full time contract, immediate start. Renewal based on performance.

APPLICATION

- Applications must include a CV with a cover letter and contacts for 2 references
- Please apply by email to: egsuarez@idibell.cat. Please, clearly state in the subject of your email "Postdoc Position" and a link to your most outstanding publication.
